SensiDO Creme Developer bag

INCI	EXPLANATION
Aqua / Water	Solvent.
Cetearyl Alcohol	Forms the viscosity of the product.
Hydrogen Peroxide	Decomposes readily into water and oxygen with release of heat, and therefore does not cause any long-term problems for the environment or the population.
Paraffinum Liquidum	Moisturizing agent.
Ceteareth-20	Forms the viscosity of the product.
Etidronic Acid	Neutralizes contaminants found in water, for example heavy metals and salts, renders them water-soluble. Contributes to the product's shelf life. Prevents changes in hair color and creates a more successful foundation for color, bleaching and perm treatments.
Sodium Stannate	Stabilizing agent
Acetanilid	Stabilizes the structure of the product
