Forme Heat Protection

INCI	EXPLANATION
Aqua	Purified water, solvent.
Alcohol Denat.	Acts as a solvent for raw materials and destroys bacteria while preventing their formation.
VP/VA Copolymer	Polymer which gives a strong, shiny hold to hair. Washes out easily.
PEG-12 Dimethicone	Moisturizes, gives shine and softness.
Butylene Glycol	Moisturizing solvent
Avena Sativa Kernel Oil	<p>Finnish, comes from Fazer. Natural oil, that is produced by extraction . Oat oil has high lipid content compared to other grain types. Oat oil is gluten free and vegan.BENEFITS:Oat oil does not irritate skin so it is suitable also for sensitive skins . It helps improve skin barrier and maintain natural moisture balance. Oat oil also moisturizes and nourishes hair. Adds softness and manageability to hair . Absorbs easily and doesn't weigh hair down. OAT OIL CONTAINS:Omega-6 fatty acids Oat oil contains three times more linoleic acid (Omega-6) compared to olive oil. Linoleic acid is present in the outer layer of the skin (epidermis). It is an important component of cell membranes, the lack of which can result in e.g. flaking the skin. Linoleic acid moisturizes, gives UV protection and has anti-inflammatory effect. Vitamin E and antioxidants Vitamin E is a widely used ingredient in cosmetics, which is also known as tocopherol. It is a very effective antioxidant, that helps prevent the negative effects of free radicals on skin cells, e.g. reduces or slows down the signs of skin aging. It has also been shown to help maintain and restore skin's natural barrier. This helps prevent scalp dryness and maintain its good condition, promoting overall hair well-being. Vitamin E also helps prevent and reduce signs of skin inflammation. Ceramides and Avenanthramides High in ceramide lipids oat oil strengthens hair keratin, repairs and smoothes the surface of the hair and helps retain moisture. On skin ceramides help protect skin surface and prevent dryness. Oats also contain a unique group of phenolic alkaloids - Avenanthramides. Mainly found in oats, these antioxidants have anti-inflammatory, anti-itching and anti-irritant effects.</p>

Sodium Methoxy PEG-16 Maleate/Styrene Sulfonate Copolymer	Styling polymer provides heat protection up to 220 ° C. Improves the performance of straightening irons sliding on the surface of the hair or reduces the friction between the hair and the irons during the processing. Provides hold, eases combing and leaves hair soft.
Hydrolyzed Vegetable Protein PG-propyl Silanetriol	Plant-derived protein which conditions and strengthens the hair. Provides thermal protection.
Ethylhexyl Methoxycinnamate	Cationic hair protective UV filter.
Panthenol	Pro-vitamin B5. Hydrates and protects hair and scalp. Antiseptic.
Polysorbate 20	Contributes to the solubility of the raw materials
PEG-40 Hydrogenated Castor Oil	Contributes to the solubility of the raw materials
Parfum	Perfume
Anethole	Perfume component
Camphor	
Citronellol	Perfume component
Geraniol	Perfume component
Hexyl Cinnamal	Perfume component
Limonene	Perfume component
Linalool	Perfume component
Pinene	
Rose Ketones	
Tetramethyl Acetyloctahydronaphthalenes	Perfume component
Benzophenone-4	Cationic hair protective UV filter.
Phenoxyethanol	Preservative
Potassium Sorbate	Preservative
Disodium EDTA	Improves product shelf-life.
Sodium Hydroxide	Base.
Citric Acid	Adjusts the product's pH value suitable for hair and skin.
