Forme Volume Conditioner

| INCI | EXPLANATION |
|--|--|
| Aqua | Purified water, solvent. |
| Cetyl Alcohol | Forms the viscosity of the product. |
| Cetearyl Alcohol | Forms the viscosity of the product. |
| PPG-3 Myristyl Ether | Hair detangling and moisturizing light oily ingredient. |
| Dipalmitoylethyl Hydroxyethylmonium Methosulfate | Cationic emulsifying and static electricity removing hair conditioning ingredient. |
| Avena Sativa Kernel Oil | Finnish, comes from Fazer. Natural oil, that is produced by extraction . Oat oil has high lipid content compared to other grain types. Oat oil is gluten free and vegan.BENEFITS:Oat oil does not irritate skin so it is suitable also for sensitive skins . It helps improve skin barrier and maintain natural moisture balance. Oat oil also moisturizes and nourishes hair. Adds softness and manageability to hair . Absorbs easily and doesn't weigh hair down. OAT OIL CONTAINS:Omega-6 fatty acids Oat oil contains three times more linoleic acid (Omega-6) compared to olive oil. Linoleic acid is present in the outer layer of the skin (epidermis). It is an important component of cell membranes, the lack of which can result in e.g. flaking the skin. Linoleic acid moisturizes, gives UV protection and has anti-inflammatory effect. Vitamin E and antioxidants Vitamin E is a widely used ingredient in cosmetics, which is also known as tocopherol. It is a very effective antioxidant, that helps prevent the negative effects of free radicals on skin cells, e.g. reduces or slows down the signs of skin aging. It has also been shown to help maintain and restore skin's natural barrier. This helps prevent scalp dryness and maintain its good condition, promoting overall hair well-being. Vitamin E also helps prevent and reduce signs of skin inflammation. Ceramides and Avenanthramides High in ceramide lipids oat oil strengthens hair keratin, repairs and smoothes the surface of the hair and helps retain moisture. On skin ceramides help protect skin surface and prevent dryness. Oats also contain a unique group of phenolic alkaloids - Avenanthramides. Mainly found in oats, these antioxidants have anti-inflammatory, anti-itching and anti-irritant effects. |
| Glycerin | Glycerin, moisturizing solvent. |

|------------------------------------|--|
| Polyquaternium-67 | Special polymer which provides volume and conditioning. |
| Quaternium-87 | Makes the hair soft and easy to comb both wet and dry. Reduces static electricity. |
| Ceteareth-20 | Forms the viscosity of the product. |
| Behentrimonium Chloride | Effective verstaile condition agent which softens hair. |
| Ethylhexyl Methoxycinnamate | Cationic hair protective UV filter. |
| Parfum | Perfume |
| Hexyl Cinnamal | Perfume component |
| Linalool | Perfume component |
| Phenoxyethanol, Ethylhexylglycerin | Maintains the safety and the structure of the product. |
| Isopropyl Alcohol | Volatile raw material solvent. |
| Sodium Hydroxide | Base. |
| Propylene Glycol | Moisturizing solvent |
